

CALL TO ACTION  
IRS DATA COLLECTION PROVISION

We have had several inquiries regarding potential legislation in the United States Congress regarding increased IRS reporting provisions. What is being proposed is to require credit unions and banks to report the inflows and outflows of funds to accounts that hold more than \$600. Latah Credit Union, the Credit Union National Association, and other Credit Unions in the United States do not support these changes. We are sharing this action alert and encourage you to take action and contact your Members of Congress today by clicking the link below.
