

# Making remote deposits with Ensenta

If your end user is using Banno Online on a mobile device, they can make remote deposits powered by Ensenta.

Retail users of core-connected institutions with Ensenta can use this feature. Ensenta RDC is only available for an end user's primary financial institution, not for accounts from their aggregated institutions.

End users who are unenrolled in Ensenta remote deposit checking see a message that says *Your account is not set up to deposit checks remotely*. They can select **Contact us to enroll** to go to your institution's *Support* screen to get in touch with you and enroll.

1. Select **Deposit checks** in the Banno Online main menu.  
The *Deposit history* appears.
2. Select **Make a deposit**.
3. Complete the **To** and **Amount** fields.

**NOTE:**

You can select **+ Add a deposit note** to include a deposit note of 50 characters or less with the deposit.

When the account is chosen and you've inputted an amount, the **Front of check** and **Back of check** buttons become active.

4. Use the **Front of check** and **Back of check** buttons to take images of your check using your device's camera.  
A *Verifying check* message appears.
5. Confirm the information that appears on the next screen by selecting **Deposit [amount]**, or select **Edit** to change the information.

**NOTE:**

To deposit additional checks, select **+Add another check**.
