Welcome to Iceland's capital city, Reykjavík. Make yourself comfortable at your hotel before refueling with breakfast. This afternoon, get acquainted with old town Reykjavík on a walking tour with a local guide to see the harbor, city hall, the Parliament building, and the nearby cathedral dating back to 1796. Day 3: Friday, February 20, 2026 Reykjavík - Golden Circle - Vík

Travel the Golden Circle this morning to experience natural wonders, including the explosive Geysir thermal area and the double-cascade Gullfoss waterfall. You'll also experience the famous Thingvellir National Park, where you'll stand upon the crest of the Mid-Atlantic Ridge. In the afternoon, stop at the Lava Exhibition Center and delve into Iceland's past and present volcanic eruptions. Afterward, witness Seljalandsfoss, a rushing waterfall where you may walk behind the water for unique views from the inside out before continuing onto Vík. Drive, or venture on foot, into the stillness of rural Iceland in search of the northern lights. Look out over the natural rock formations at Dyrhólaey, a small peninsula of volcanic origin towering over the ocean. Next, visit the Skógar Museum and discover its turf-built homes and artifacts. Afterward, stand in awe before the impressive Skógafoss waterfall, one of Iceland's biggest and most beautiful waterfalls. The overall activity level of this tour is a level 3. This means you're an on-the-go traveler. You don't want to miss a thing, so walking and standing for longer periods of time (2-3 hours) isn't a big deal. A moderately paced two-and-a-half-hour walking tour, covering several miles, hills, and uneven surfaces, is no problem for you. Walking four miles over the course of a day is very doable, as is climbing into and out of various modes of transportation (tuk-tuk, cable car, zodiac, etc.). You can climb three flights of stairs easily and handle altitudes between 6,000 and 9,000 feet. Expect some longer days with early mornings or late nights balanced with free time to recharge or set out on your own adventure. This level is not a fit for travelers who require mobility assistance devices.

If you require any special assistance while on tour, please make us aware at time of reservation so the necessary request form can be sent to your attention.

This tour takes place in the winter. You can expect varying weather conditions with brisk days and limited daylight.

Most natural sites such as waterfalls, beaches, and lava fields require walking on unpaved, uneven surfaces rendered slippery by ice and rain.

The Northern Lights Cruise departs from the port usually at 9:00 PM and finishes after 11:00 PM.

Due to long-distance travels to the Jökulsárlón Glacial Lagoon, you may expect free time after 1:00 PM for lunch on your own.

Museum visits and shopping may be affected by observance of religious or local holidays.

*The northern lights are in the Northern Hemisphere from September through April and are only visible when the sky is clear and free of clouds. **As this tour is weather dependent, sightings of the northern lights are not guaranteed.**

**The northern lights cruise is weather dependent and may be postponed or cancelled in the event of adverse weather or sea conditions.

We seek to best utilize your time while on tour; to account for the potential of adverse weather, some activities or days may need to be altered, shifted, or cancelled.

Hotel check-in will be immediately available on your arrival day. It does not apply on pre-arrival days. If your flight arrives in the early morning, breakfast will be included once you arrive to your hotel.

Single accommodations are limited and are available on a first-come, first-served basis. Single rate subject to change based on availability.

Coaches which may not be lavatory equipped may be used on this program. In this case, stops are made during travel periods. Due to the

Experience It! The Northern Lights

Each year, during the winter months, travelers journey to Iceland and venture out into the dark to see the magical but elusive northern lights (aurora borealis). This natural phenomenon is the product of collisions between electrically charged particles from the sun that enter the earth's atmosphere; the results are spectacular. Streaks of colorful light appear across the sky. The colors can vary from white to pink or purple and, most commonly, green. It is known that the best time to witness the lights in Iceland is from late September to mid-April, when the nights are the longest. This light show is truly dazzling and worth the pursuit.
